CALIFORNIA STATE UNIVERSITY, LONG BEACH

DAILY 49ER

Vol. LIX, Issue 478 | www.Daily49er.com | Wednesday, May 9, 2012

DENISE BENDER | DAILY 49ER

Protesters chant and crowd the front of the CSU Chancellor's Office in Downtown Long Beach demanding change in administrative pay.

Trustees outline 'cost reduction strategies,' freeze president pay

Lt. Gov. Gavin Newsom 'fears' tuition increases, enrollment caps.

BY ZIEN HALWANI
Editor in Chief

The Cal State University Board of Trustees froze state-funded pay for incoming presidents Tuesday and discussed a number of "cost reduction strategies," as about 50 members of the California Faculty Association protested outside the Chancellor's Office.

The board outlined some 20 different strategies aimed at dealing with a likely state trigger cut and a $350-400 million structural deficit to the CSU system.

"We are now in a position we have never been in before," CSU Chancellor Charles B. Reed said after a 45-minute presentation that sketched out the possibility of cutting CSU employee and faculty salaries, limiting employer contribution to health care benefits and streamlining the elimination of low-enrollment degree programs.

"We cannot continue to sustain [health care] cost at the [funding] level we are at," Reed said.

The presentation also introduced the possibility of charging students extra for taking more than 16 units per semester, repeating courses or taking enough units to be considered a "super senior."

Traditionally, "supers seniors" are those who take more than 100 precent of the units required for their primary majors.

The board even discussed closing campuses, allowing campuses to set their own tuition based on "market demand" and charging more for higher-cost degree programs, but many of these strategies were dismissed as unfeasible.

BOT Quick Look

- The CSU will "more than likely" face a larger trigger cut.
- CSSA reluctantly supports three-tiered tuition model.
- Board allows foundations to augment presidential pay.
- CFA protests outside Chancellor's Office.

"We are not going to close campuses," Reed said. "That's not going to work."

As the 23-campus system awaits Gov. Jerry Brown's revised May 14 budget, it deals with the "very real possibility" of a state trigger cut higher than the expected $200 million cut, according Robert Turnage, CSU assistant vice chancellor for budget.

This larger trigger cut would be compounded by the system's $350-400 million structural deficit with many of the CSU's larger "cost reduction strategies" requiring negotiation with the CFA and other unions representing CSU employees.

Lt. Gov. Gavin Newsom expressed his concern with relying on these strategies to solve impending budget problems.

"I'm fearful that tuition [increases] or capping enrollment ... will be our only two options," Newsom said, highlighting the fact that the CSU has

Nguyen makes LB's top 40

The ASI president has decided to go into marketing instead of politics.

BY ELISABETH MANVILLE
Staff Writer

Associated Students Inc. President Lucy Nguyen was recently honored as one of the Long Beach Post's 40 Under 40, which recognizes 40 people under the age of 40 who contribute to improving the Long Beach community.

Nguyen said that her selection as one of the inaugural 40 Under 40 has been a humbling experience. There were more than 200 people nominated for the honor by Long Beach Post readers.

"To this day, I have no idea who nominated me," she said.

Although she has two courses to take for her major in business and minor in political science, she said she knows that after this month, her relationship with Cal State Long Beach will never be the same.

"Long Beach is my heart and my soul," Nguyen said.

Nguyen, who served as Senator for the College of Business Administration and ASI Vice President before becoming the president, looks back fondly on her memories at CSULB and said she is proud that she had the opportunity to do the things she did.

She cannot just pick one experience as the most rewarding, but cites lobbying for financial aid and the "little things" that can lead to a better campus, such as finding a federal grant to place recycling bins on campus.

She said she believes the key to positive change is collaboration. Working best with others is a challenge, but an important leadership skill, according to Nguyen.

Lucy Nguyen

Brian Addison, senior editor and contributor to the Long Beach Post, said in an email that Nguyen is among the many young people in Long Beach who are actively taking a stance to

NGUYEN | Page 2

Enrollment cuts make CSUs more competitive

First-time freshman application yield rate lowest since 2003.

BY VINNY EARLEY
Staff Writer

Getting accepted to a Cal State University as a first-time freshman is becoming more competitive now than it has been in the past.

According to data from the CSU website, the enrollment yield rate of first-time freshman applicants in 2010 was the lowest since 2003, with enrollment decreasing by 5 percent.

Erik Fallis, CSU spokesman, said that it's not a matter of the CSU increasing its selectivity.

"The base CSU criteria is set for the same level of student performance today as it has been set for decades, but impaction is having an impact on specific campuses because it is shifting that bar," Fallis said. "And that is changing some access for students."

Fallis went on to say that students who are accepted to a CSU and do not accept also affect the enrollment yield rate.

Eric Hernandez, who is now a graduate engineering student at CSULB, was accepted to CSULB straight out of high school in 2001. He said that increased requirements for first-time freshman might not necessarily be a bad thing in terms of preparing students for college.

Discounts website helps students save cash

School ID Savings features special discounts for CSULB students.

By Jenny Lee
Staff Writer

School ID Savings, a discount website for students, started as a simple idea from 21-year-old Chapman University entrepreneur Jason Cunnigham to accommodate college students as well as local communities with a website that lists local student discounts.

Currently, School ID Savings has signed up businesses in Chapman University, University of La Verne and Cal State Long Beach areas. Campus representatives have recently been accepted and installed at Cal Poly San Luis Obispo, University of California Santa Barbara, Chico State and Gonzaga University in Washington. The businesses that sign up for each school only offer discounts to those students.

Cunningham, a junior international business major at Chapman University, got the idea for the site when he realized the only reason he carried his school ID card was to get a student discount.

"I went online to find where I could get student discounts, but nearly every school that I researched for, there was no place where I can find a list of places with discounts," Cunningham said. "And I kind of realized that businesses have no way to communicate with local students at all."

Students have made it clear that School ID Savings has been a huge factor in their choice of which businesses to go to, according to Cunningham.

"There are a few businesses that have listed their student discount exclusively on School ID Savings, and those businesses have seen an increase in traffic and revenue from students," Cunningham said. "And students love it because they get an affordable meal or clothing due to the student discount provided."

Right now Cunningham is trying to expand his site by reaching out to businesses and students.

There is only one business, Flame Broiler, signed up in the Long Beach area. The owner also has an Orange County location on the site.

"I have not had any direct communication with students from Long Beach, but since there is not a campus hero at Long Beach I doubt many students have heard about the website," Cunningham said. "I am looking for someone interested in a paid internship based on commission. They will be able to negotiate with local business owners to sign up for School ID Savings."

Brian Roh, a freshman art student, thinks this service would be useful for all students, but especially for students who pay for their own tuition.

"I think that it would be great to get student discounts, since school is already expensive enough," Roh said.

Remy Tan, a senior on a tight budget, said he would definitely use the service if it would save him money.

"I get an allowance from [my] parents, but I only get money when needed, so I have just enough for survival," Tan said. "I have about $250 per month, and I spend $125 on gas and the other on food and things I need."

Tan said he can live with what he has, but it is pretty hard because he tries to only spend money on what he needs instead of what he wants.

Tan said he tries to eat at home whenever possible and only goes out with friends once a week.

"With gas prices soaring up tremendously, it would be nice to find some discounts for gas stations," Tan said. "Also, since I sometimes eat out for lunch, there should be student discounts for restaurants or food places."

Future ASI execs rock out

Jonathon Bolin, ASI vice president-elect, left, Zac Bitner, center, and John Haberstroh, ASI president-elect, played a free show at the Nugget yesterday at 3 p.m. The rock band Hail Nero pumped up the crowd with a lot of energy and played for 30 minutes while students could enjoy a meal.

CSU

Continued from Page 1

"You don't really have to try very hard to do well in high school, and in college they obviously have a higher standard," Hernandez said.

Hernandez, who is set to complete his master's degree next winter, went through Questioning Understanding and Engaging in Success through Technology (QUEST) at Millikan High School in Long Beach. QUEST is a program designed to prepare students for the competitive admissions processes at the University of California and the CSU.

Hernandez said he wasn't worried about getting accepted to CSULB. He was so confident that he didn't bother applying to any other schools.

"I don't think that thought ever entered my mind," Hernandez said. "I just didn't think I wouldn't get in."

The path to college was pretty well laid out for those in QUEST, according to Hernandez.

"I didn't have to worry about not getting the classes because it was a different schedule from the rest of the school, and it was just kind of a sheepish mentality," Hernandez said. "It was just 'follow the course' and there was plenty of help to not do badly."

For Christina Maurillo, a 19-year-old Laguna Niguel resident, the process of applying to CSULB has been a bit more stressful. Maurillo is currently enrolled at Saddleback College in Mission Viejo and hopes to transfer to CSULB in fall 2013.

"I was actually really nervous about applying because I heard that they're cutting back on how many people are actually getting in," Maurillo said.

Maurillo said she originally planned on starting school in the fall but couldn't complete the units necessary in time for the deadline.

"I was taking six classes this semester, and within the first week I was dying so I dropped one," Maurillo said. "I thought you could take them in the summer before going into school."

Although Maurillo only has two classes to take before the next application deadline, she is looking at the positive side of it. She hopes to begin working toward getting her pilot's license in the summer and eventually become a commercial pilot in the future.

Nguyen

Continued from Page 1

make the city better and more dynamic.

"Her fight for educational values is almost unparalleled and reflects her hard work for both students and those who appreciate the importance of education," Addison said.

Nguyen credits her three mentors — Howard Fletcher, director of the Student Center for Professional Development in the College of Business Administration, John Nguyen, founder of Youth Leadership of America, and Doug Robinson, the vice president for student services at CSULB — with helping her to grow as a person and a leader.

They guided and advised her but would never tell her what to do, she said.

Although she will miss the unique opportunity to serve the CSULB campus which comes with being ASI president, Nguyen said she is looking forward to the future.

"I think Long Beach has prepared me well for the working world ... my dream is to eventually open my own marketing firm," Nguyen said.

She would like to specialize in digital media and marketing for charities.

She will start a summer internship with Target on June 11, looking at diverse departments and seeing how they can be improved. She has not yet decided where she will work in the fall.

While she has enjoyed working in student government because she got to advocate for higher education, she has decided that a future in politics is not for her. Her passion is marketing and she plans to make a difference through that.

"It is very admirable, because politics is a whole other ballgame," she said. "You have so many interests you have to take into account."

A profile of Nguyen, as part of the 40 Under 40 list, will be in the print edition of the Long Beach Post on May 14.

Student threatens staff member, throws punches

By Jessica Rosales
Staff Writer

University Police responded to a call about a student refusing to leave the Disabled Student Services office located in Brotman Hall, Room 270 on April 27, University Police Capt. Scott Brown said.

The student, a 60-year-old heavy-set, black woman, was upset and yelling threats, Brown said. She also tried to punch a staff member, Brown said. University Police are currently unsure as to why the woman was upset, Brown said. The victim did not want to press charges, Brown said.

Drive-by egging

Students reported having eggs thrown at them on Merriam Way near Parking Structure 1 on April 27 at 10 p.m., Brown said.

The two women saw a white 4-door vehicle drive past as eggs were being thrown in their direction, Brown said. Once University Police arrived, they were unable to locate the vehicle, Brown said.

Swiped surfboards

A student reported two surfboards stolen from the top of his 1994 white Ford Escort on April 21 around 5 a.m., Brown said.

The Parkside dorm resident had secured the boards to a surf rack and parked his vehicle on the road near the Isabel Patterson Child Development Center, according to Brown. When he returned, the boards were missing. The total estimated loss is valued at $450, Brown said.

Foot fetish

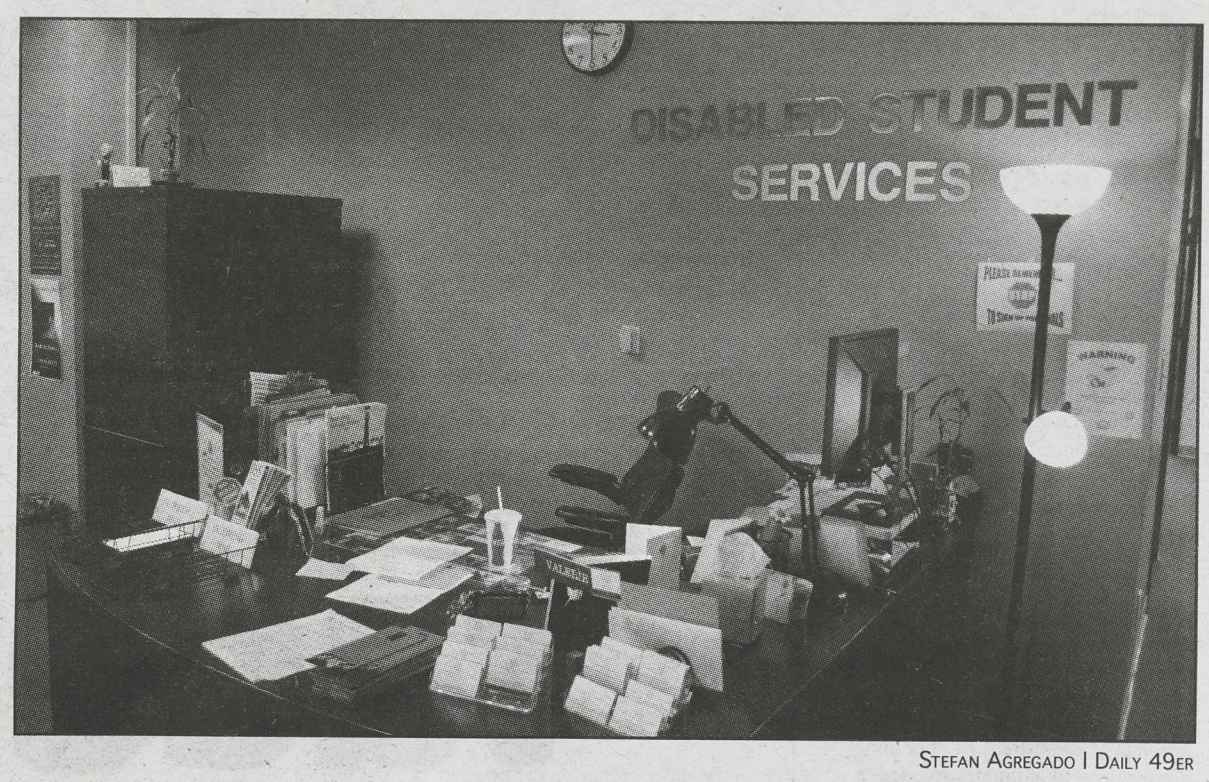

A student reported a man rubbing her foot and making her feel uncomfortable on April 30 around 8 p.m., Brown said.

The student was studying in a cubicle at the University Library and felt the suspect touch her foot, Brown said. When she confronted him, he left the area, Brown said. University Police made contact with him and the victim filed a private person's arrest, Brown said. The suspect was cited and must appear in court, Brown said.

Vandalized motorcycle

A student's 2009 black Yamaha R6 was vandalized in Lot 10 on April 26 around 11 a.m., Brown said.

When the student returned to his motorcycle, he found deep scratches near his oil tank and the oil cap was stolen, according to Brown. The total cost of the damages is about $400, Brown said.

Stefan Agregado | Daily 49er

A 60-year-old woman was kicked out of the Disabled Student Service offices for making threats and trying to punch a staff member.

BOT

Continued from Page 1

been negotiating a successor contract with the CFA for two years.

Although many of the strategies presented by the board were dismissed as financially or politically unfeasible, the California State Student Association reluctantly endorsed some as a final option to mitigate state cuts.

According to CSSA President Gregory Washington, the student organization would support a three-tiered tuition model, where students would be charged extra for taking more than 16 units, charging students more for repeating courses and consolidation of administrative departments across the CSU system's 23 campuses.

Presidential salaries

The board also moved Tuesday to freeze state-funded salaries for incoming presidents but allow the 23-campus system's foundations to augment these salaries by up to 10 percent of an incoming president's predecessor-salary.

"The message we are sending is not consistent with the austerity measures," Newsom said, regarding the salary freeze.

The lieutenant governor criticized the board for what he saw as policy that would continue to guarantee incoming CSU presidents a 10 percent salary raise.

But some on the board disagreed.

"[This policy] gives the option but it's in no way guaranteed," Trustee Robert Monville said.

The board stressed at Tuesday's meeting that CSU foundations would use discretionary funds to augment presidential salaries only if they choose to.

Reed also said that the board was advised not to allow CSU foundations to augment presidential salaries by more than 20 percent.

The current policy caps salary augmentation at 10 percent.

Faculty protest

But, while the board debated the merits of a presidential salary freeze, some 50 CFA members protested outside the Chancellor's Office chanting, "Move Reed! Get out the way, get out the way" and "Hey-hey ho-ho Charlie Reed has got to go."

The CFA chants could be heard from inside the board meeting.

During the board's lunch break, the protesters gathered under a large cut-out of Reed to listen to various speeches from CFA members and other union officials.

Natalie Dorado, a Students for Quality Education organizer, discussed her hunger strike.

"The chancellor is trying to divide us," Dorado said.

Social media legislation protects students' privacy

OUR VIEW

Keeping your personal and professional lives separate is important these days. What someone does outside the workplace or classroom should not be an issue unless it is directly affecting his or her performance.

However, the rise of social media has caused more employers to keep tabs on both prospective and current employees. Even public and private universities are looking for insight on prospective students by searching their Facebook profiles.

This trend of employers and universities tracking social media accounts has spawned the California legislature to take action.

On May 2, 2012, the California Assembly Committee of Labor and Employment unanimously passed Assembly Bill 1844. The bill prohibits employers from requesting personal social media user names and passwords from employees.

The Social Media Privacy Act was also approved a week before by the California Senate Labor and Industrial Relations Committee. It prohibits colleges from asking for prospective student social media user names and passwords as well.

In both situations, this is a step in the right direction toward maintaining some shred of privacy in a world where almost anyone can display their entire life online.

People enjoy sharing their lives with friends and family through social media. Using social media is a great way to stay connected. Personal social media profiles should not have an effect in the workplace or classroom. Whether what someone posts on Facebook is politically correct or not, social media profiles should be considered an extension of our private lives. Employers and universities should not visit these profiles expecting to get a better grasp of the person.

It is understandable why employers and universities would want to check prospective employee and student Facebook profiles. There is a lot of information on social media sites that give insight on prospective employees and students. That information can help bosses and college administrators decide whether someone is the right fit for a company or school.

The problem is that many people are different from the persona they portray online. Employers and universities can get a wrong impression of the person they are tracking and this could determine whether a qualified student or employee is admitted or hired.

These new laws should not dissuade individuals from keeping their Facebook privacy settings tight, though.

Just because employers and universities cannot ask for social media user names and passwords, they can still Google applicants' names.

The most important thing to remember is that social media profiles are a representation of an individual. Whether or not someone can legally follow someone's Facebook profile does not mean they should not worry about their image.

With the new Facebook timeline making it easier than ever to rummage through people's pasts, do not post photos and statuses that can come back to haunt you later. What you post will stay there forever.

These new laws do relieve some of the stress of wondering whether employers or universities can keep tabs on prospective employees and students.

However, just because they are not asking for the information does not mean they cannot find it. The Social Media Privacy Act does not change the importance of making our social media profiles accurate extensions of our lives.

CSULB provides resources for students dealing with tragedies

REBECCA EISENBERG

On April 14, the sailboat Low Speed Chase embarked on the 54 mile Farallones race in the bay area. Jordan Fromm was not only a member of an eight-person crew, but also one of my very best friends since freshman year of high school.

Turning around the island, an immense wave pummeled the sailboat, knocking two members into the ocean.

Seconds later, a second incessant wave hit, heaving another five members into the sea. Nick Vos was the only member who remained onboard. Due to the weather conditions that day, the yacht was thrust against the rocks of the South Farallons.

When the coast guard arrived, one member was found dead in the water and four were missing, including Jordan Fromme.

Desperate to carry on, I simply checked out. I missed class, work, and various commitments. I shut off my emotions. I turned away from my friends and family and tried to remain blank for as long as I could.

Finally, in a conversation with my mom, I let it all go, which I feel was the straw that broke to force my recovery.

When something such as this happens in our lives, sometimes the only way to deal is to disappear. But, this does not allow us to heal.

Unfortunately, death is a part of life and I am not the only one dealing with this horrifying incident. I have friends and family members that have lost parents, brother, sisters and lovers.

Instead of choosing to ignore death like our society has taught us to and turning away from the pain and pretending that everything is fine, it is so important to cope with death by turning towards it.

When people ignore their feelings, they often linger and ultimately consume us.

There is an abundance of resources for our well being on campus including grief counselors, advisors, and guest speakers. They are all understanding of our circumstances and our unique methods of coping.

The most important thing to remember is not to disappear in difficult times.

What helped me was realizing that I was not alone.

Being part of a college campus such Cal State Long Beach creates so many opportunities for support.

Initially, I thought it was okay to just run from the pain, but when I finally realized I had to face the truth and began expressing my feelings of anguish, the pain started to move through me and eventually lessen.

Dealing with pain does not mean that it will ever truly disappear. I will always feel some sort of emptiness when I think of one of my closest friends. He will always remain in my heart and memories and will live on in my dreams.

Balancing work and fun is the key to a great summer vacation

SARAH EHLERS

School's officially over. There are some typical summer things to do such as road tripping to Tijuana, backpacking through Europe, visiting family or vacationing in Hawaii.

While it's easy to get into the spirit of messing around and forgetting about school in the next three months, it's best to not get completely sidetracked.

Whether you're graduating, or stuck here for another three years there are a few things you can do to keep your summer productive and not boring.

You can start with getting an internship. Interning over the summer is hard work, but you'll be learning a lot, meeting new people and getting ahead in your career. That can't be too bad right?

A summer internship is one of the best ways to keep yourself busy over the summer months. Working at an internship during the week makes it worthwhile when you go out on the weekends with your friends.

Look into what ever your prospective career is and talk to some of your professors to see where internship opportunities are available.

At the very least, you'll be networking, and maybe even get to partake in some work parties.

You should also make a workout plan. Every New Year's Eve the most popular resolution is to work out and get a great six-pack by summer.

Even though summer's just around the corner, it's not too late to get your abs a little more toned.

There are plenty of abdominal workouts that have been popular among students such as Insanity and P90x that seem to be effective.

But if you don't want to splurge just to get a workout video, a Google search will point you in the right direction and get your body looking the way you want. And don't forget, a workout plan includes healthy eating habits too.

You can also try making a short-term bucket list. Go see the movies you always hear about but never watch, go read the books that have been sitting on your shelf all semester.

Go buy tickets for those shows you need to make up for since you missed Coachella, or visit the bars you've been neglecting during finals. You'll be doing all the things you've wanted to do all semester.

Finally, try doing something you've never done before. Do something that's not on your list. Get out of your comfort zone and pick a new hobby.

Take a hip-hop dance class at a studio, perform at an open mic night with one of your friends, hike up to the Hollywood sign or spend the day at Venice Beach laying out in the sun.

At the end of the summer, you'll remember doing something you never tried before.

As much as everyone's going to try and live it up this summer, just remember to have fun and be safe.

Everyone will probably be yelling YOLO after every beer chug and shot taken this summer, so it's going to be pretty hard to resist the temptation to forget all of your responsibilities. But, you should definitely let loose.

Just do something productive after. Whether it's knocking out more adventures or getting a head start in your career, get started and just do it.

And just remember, no one ever remembers those nights they got plenty of rest.

Sarah Ehlers is a senior journalism major and a contributing writer for the Daily 49er.

Students should embrace finals week stress before graduation

EMILY ANDREWS

Graduation poses a whole new level of anxiety for graduating seniors that surpasses the regular midterm stress, the anticipation and unfamiliarity of the first day of college as a freshman, and quite possibly every other milestone that comes up along the way.

Being a part of this demographic, I can definitely relate and say that although the next two weeks will be the supplier of one of the most exciting times in college, it is quite possibly the scariest.

Although optimists may see this finals week as no different from the rest, I believe that our entire college career depends on the outcome of our final exams.

As if the pressure and nearly impossible task of graduating in four years wasn't hard enough, now we are faced with another obstacle before gaining our freedom.

But that's enough pessimism. Despite the fact that a good portion of my fellow seniors will be on the brink of a mental breakdown at some point in the next two weeks, we are so fortunate to be embarking into the real world at such a swift pace.

I admit that I was always the student who couldn't wait to get to the real world, but my mind definitely changed for a second.

A great majority of this change of heart is due to the fact that the idea of a full-time job scares me.

As much as I hate to admit it, Cal State Long Beach has become a security blanket.

I think the real reason is clear: the college experience is irreplaceable.

I am able to sleep at night by reminding myself that I have had a very fulfilling college experience.

I joined a sorority and participated in Greek life, studied abroad in London, interned at a public relations firm and wrote for the Daily 49er.

I have little regret when I look back and reflect on my time at CSULB.

We cannot repeat our college experience. Even if we try to recreate the undergraduate experience, graduate school and law school will not match up.

We must look at our time in college as a phase that has passed. Lucky for us, life does not consist of just one phase or experience. There are multitudes.

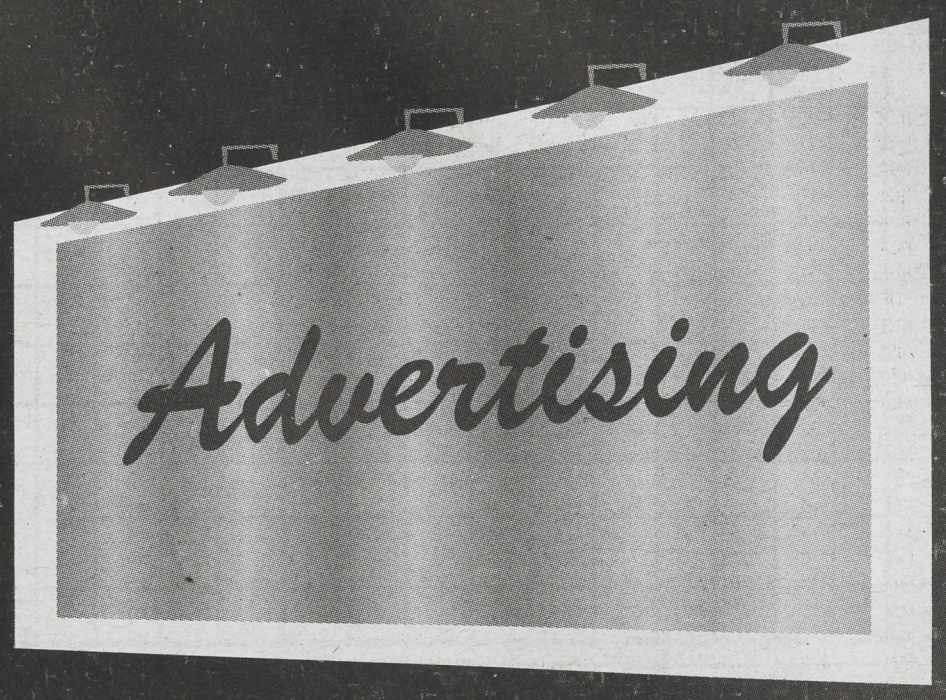

Even though life after graduation may not seem nearly as fun and entertaining as college life, it possesses a great deal of new and exciting opportunities.

As we leave the past four or five years behind, let's embrace the stress of finals one more time before we encounter the new stress of having a full-time job.

Emily Andrews is a senior journalism major and a contributing writer for the Daily 49er.

EMPLOYMENT OPPORTUNITIES

Student Advertising Representatives
for the **Daily Forty-Niner**

The Daily Forty-Niner and Dig Magazine Advertising Department seeks enthusiastic, self-motivated individuals to join our advertising team. The following position is available. Benefits include:

Experience in building brands for clients
Valuable work experience
- Marketing & Sales
- Ad Copy & Layout
- Mix Media Sales
- Networking

High learning potential
Build a professional portfolio
Flexible Schedule

Good communication skills and self motivated a plus. Reliable transportation a must and CA drivers license and Social Secity card. Must be an enrolled student at CSULB.
Apply in person in the SSPA Bldg. Room 010. Ask for Beverly Munson.
(562) 985-5736 bmunson@csulb.edu

'Avengers': Sequel to four different film franchises

The movie is one of the biggest of all time.

WALT DISNEY PICTURES

Joss Wheden's "The Avengers" is now being shown in theaters nationwide. The movie grossed approximately $200 million in its opening weekend.

BY MATT GRIPPI
Staff Writer

Marvel's "The Avengers" is one of the most ambitious film projects of all time. In 2008's "Iron Man," geeks who stayed after the credits were treated to a scene with Samuel L. Jackson as Nick Fury telling Tony Stark about The Avengers Initiative. This was such a strange experience to see a character who wasn't in the actual movie talking about another film, which was most likely years away and hadn't even been started.

Little did we know, they had planned this all along. "The Avengers" would be released as a collective sequel to "Iron Man 2," "The Incredible Hulk," "Captain America" and "Thor." Four different film franchises taking place in different settings with different characters, sometimes in different time periods or on different worlds. How could they possibly have pulled something like this off?

After the biggest opening weekend of all time with a whopping $200 million dollars, it is clear that somehow they have pulled this off. Writer and director Joss Whedon finally found a project that was perfect for him.

The plot is your basic comic book set-up. A being from another world has come to earth with the intention of stealing an object of unlimited power and using it to rule over all humanity. What makes this villain interesting is that it is Thor's (Chris Hemsworth) brother Loki (Tom Hiddleston) who was banished from his home of Asgard in the "Thor" film. Luckily, Loki has managed to find an army of "Chitauri" who will do his bidding as long as he steals the "Tesseract" from the humans.

The Tesseract is a cube-shaped object which has the potential to do almost anything. It's the epitome of a "McGuffin," or a plot device that moves the story along without actually meaning anything. The film actually gets off to a slow start because Nick Fury and the rest of the S.H.I.E.L.D. crew spend a lot of time talking about the technical aspects of the Tesseract like it actually means anything to the audience. It's essentially a glowing cube that Loki wants, and that's really all we need to know.

Once the film gets to the actual Avengers, it becomes fantastic. Whedon has managed to keep everything that makes these characters interesting and unique, while also making them fit into this universe with each other. The point is that these characters do not belong together. They're loners and outcasts who have been forced to band together to save the world they love. Just seeing Captain America, an unfrozen 1940s superhuman soldier with an indestructible shield, standing next to Thor, an inhuman God from space who flies around with a magic hammer, is bizarre. Somehow it works, and the characters' differences are what makes it so exhilarating to watch them kick ass together.

Finally, Whedon fans can stop complaining. Whedon has had a cult fanbase ever since his show "Buffy the Vampire Slayer" gained fame in the 90s. Since Buffy, he has had trouble getting projects off the ground. His series "Firefly" and "Dollhouse" were cancelled well before their prime, which made Whedon fans angry like the Hulk. However, it doesn't look like Whedon fans will have to worry about that anymore, because their cult hero has just released one of the biggest movies of all time and will no doubt be a major Hollywood player for the rest of his career.

He deserves it. "The Avengers" is an unquestionable success, and retroactively legitimizes all the previous Marvel releases, which seemed like they were all part of a bigger picture. Hopefully Marvel will continue to churn out successful superhero films so we can see these guys team up once more before the actors get too old.

Campus Calendar

May 9

Student art galleries
The art department presents BFA group exhibition on drawing and painting, and sculpture from noon to 5 p.m. between the FA2 and FA3 buildings. Admission is free.

Bike check
Rideshare @ The Beach will hold free bike checks in the USU Quad from 11 a.m. to 1 p.m.

'Late: A Cowboy Song'
The University Players presents "Late: A Cowboy Song" at 8 p.m. at the Players Theater. Tickets are $15 for students and $20 for general admission.

Long Beach State Athletics

Long Beach State senior track and field athlete Tyler Wallace will defend his Big West Conference title in the pole vault this weekend.

Wallace looking to keep his title

Senior track and field athlete Tyler Wallace will defend his Big West title this weekend at UCI.

By Kierney Ross
Staff Writer

While most seniors are busy studying for finals and preparing for graduation, the Long Beach State track teams' reigning Big West Conference pole vault champion, Tyler Wallace, is focused on maintaining his title.

The Southern California native was named the Big West pole vault champion when he cleared a career-best 18-00.50 at the 2011 Big West Championships.

That effort put him in a tie for fourth on the school's all-time charts as well as earning him a spot in the LBSU record books as the fifth vaulter in the school's history to clear 18 feet.

Most recently, Wallace was given the conference Men's Field Athlete of the Week award for becoming the top collegiate finisher and placing third overall in the men's pole vault at the Beach Invitational on April 21.

He tied the winning height of 17-03.50 and came in third on attempts. This height marks a season best for Wallace, ranks him second in the Big West and 33rd in the nation.

Although the senior now has a title to defend, Wallace first started jumping the pole vault while he was attending Chapparral High School.

"I played freshmen baseball and didn't really play, so my best friend asked me if I wanted to try the pole vault with him and his brother," Wallace said. "I instantly fell in love with it."

Wallace quickly adopted the pole vault into his weekly routine, doing all he could to clear heights beyond the average persons reach.

"[Pole vaulting] is just exciting," The senior said. "Its kind of like cliff diving or any thrill sport where the more excited you are the better you do, and then the better you do the more exciting it is."

He added: "It's self-sufficient and gives you more an adrenaline rush than any other sport I have ever played."

Wallace went on to become a three-time CIF finalist in track and field before graduating from Chaparral High in 2008. He went on to attend Riverside Community College where he led the track team to back-to-back California state titles.

As a sophomore, he won five of the six meets he competed in and was a state finalist in the pole vault in 2010.

During one of the head-to-head meets versus LBSU, Wallace met 49ers coach Andy Sythe and quickly developed a relationship with him.

"I talked to coach throughout the year and decided that after that year I wanted to come [to LBSU]."

Although the senior won the Big West Championships last year by clearing 18 feet, Wallace is determined to go farther than just his previous personal-best.

"The school's record is 18-07.05 and the goal is definitely set on that but 18 feet is the minimum for the B standard for the Olympics and that is definitely something I want to do," Wallace said.

While Wallace stressed that the pole vault is more of a thrill than throwing a baseball once was, he pointed out that in this sport, you must be in the right state of mind to perform well.

"One of the big problems with pole vaulting is that you get a lot of mentality. You're either doing really well or your thinking too much and if you're thinking too much you're not going to leave the ground at all," he said. "If the mentality is not there, you're not going to jump at all. You will run full speed into a dead stop."

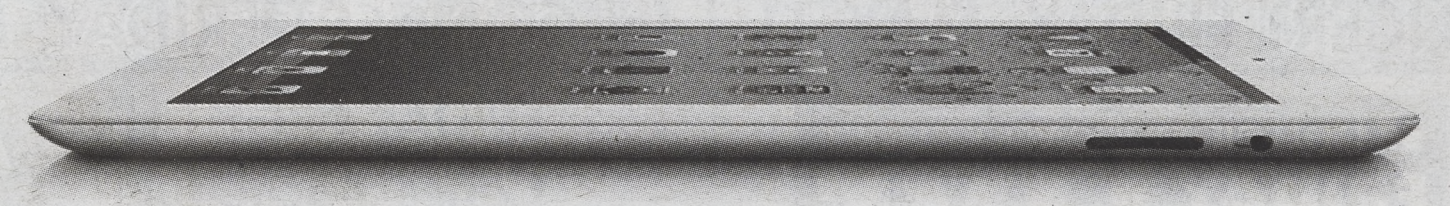

He also stated that in addition to the mental hazards that come with the sport, pole vaulting too comes with its fair share of physical risks.

"Sometimes you will be the person jumping right after someone breaks a pole and if that happens it can split or even break hands," he said. "I've seen splinters of fiberglass pierce people before."

While it is evident that the event has several potential dangers, the senior pointed out that sometimes you have to just shrug off what you see and give it your all.

This weekend, the reigning champ will be giving it his all to defend his title at the Big West Championships starting on Friday May 11 at Anteater Stadium in Irvine, Ca.
